Master all your challenges with Initial from GC

Lustre Pastes NF from GC, the **unique 3D paintable ceramics** to bring **aesthetics** to all your precious works … just by painting.

You no longer need complex layering or extra firing cycles to obtain an **unsurpassed vitality** and a **natural glaze** for all your restorations.
With the Lustre Pastes NF (based on fine ceramic particles) the steps to complete your crown and bridgework remain identical, regardless of the technique you use to create ceramic-based restorations.

Do you need to change the colour, the brightness, the grey value or the surface gloss of your layered crowns and bridges? You can use the Lustre Pastes NF on all ceramics in the GC Initial range.

Looking for a way to add extra vitality to your CAD/CAM produced monolithics? Lustre Pastes NF is the solution in any case.

Do you prefer to press your ceramics … start with either the GC Initial IQ - One Body, Press-over-Metal or Press-over-Zircon systems, and then paint the characteristics at a later stage.

This system allows you to individualize your crown and bridgework AND to create a lifelike transition from the crown margin to the gingiva ... just by painting.

Paint your ceramic aesthetics with Lustre Pastes NF from GC for both white & red aesthetics

Lustre Pastes NF Gum shades

All you need to create a lifelike transition from the crown margin to the gingiva in a few easy steps.

The 5 unique gum coloured Lustre Pastes allow an individual adaptation, to match natural gingival shades in natural harmony. You can use the 4 mixable Gum Modifiers allowing for unlimited creativity and to reproduce the most delicate gum case without any problem.

The Lustre Pastes NF Gum Shades are based on a special selection of non-fluorescent, pink coloured ceramic particles to perfectly mimic the look of natural gum.

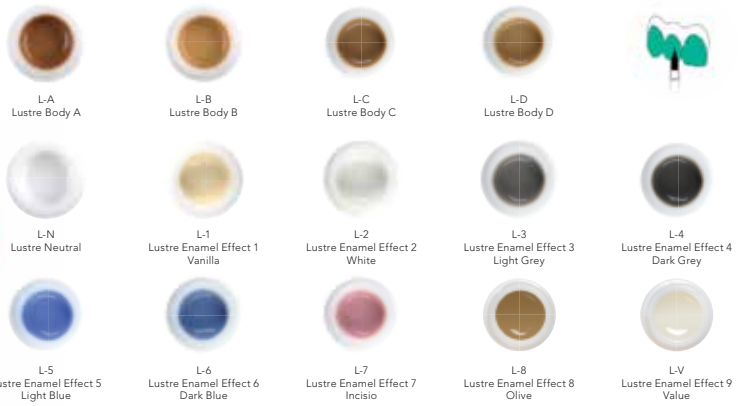

Lustre Pastes NF V-Shades

The required V-Shade is created by the application of the Lustre Pastes NF ranging from "Body A - D". This process, which only takes 2 minutes, contains everything which is necessary to create V-Shades. As a master, simply use the other available colours to create highly aesthetic results.

With the Lustre Pastes NF you can easily modify your conventional ceramic crown and bridgework. Changing the brightness, value and colour has never been so easy!

The fastest solution for all your monolithical zirconiumoxide works.

Two systems – One approach

Paint your Red & White aesthetics

Perfect finish to your restorations
